

## Press Release

# Aero Air is latest Astronics Dealer

January 19, 2011- Aero Air and Astronics are pleased to announce their latest partnership. Aero Air LLC has been named an Astronics dealership for the EMPOWER® 28VDC to 115VAC In Seat Power Supply System. This will allow them to serve their customers better, offering them patented Astronics power supplies and accessories.

Innovators of intelligent power systems, Astronics AES has developed the EMPOWER® system to be compact and light weighing only two pounds, while supporting up to three Outlets. The design, which includes patented safety features such as Ground Fault Interrupt, no power at outlet until an appropriate device is plugged in, thermal protection, over and under voltage protection, meets or exceeds FAA requirements and complies with the 2005 policy statement for certification of power supply systems. The EMPOWER® system is TSO certified and easy to install.

This relationship allows Aero Air to offer the latest developments in power technology for their customers who wish to operate and charge Portable Electronic Devices while flying. The EMPOWER® system is the latest in customizing an aircraft to suit the latest trends in business and technology.

EMPOWER® systems have been selected by over 150 airlines and OEM's with over 500,000 Outlets installed.
